(54) PROGRAM RECORDER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a program recorder that can automatically record a viewed program in preparation for an unexpected event and requires no recording operation.

SOLUTION: The program recorder is provided with an input terminal 1 such as an antenna, a reception section 2 consisting of a tuner, a recording control section 3 that records a received signal on a recording medium as its control, a recording medium 4 such as a VTR, a microcomputer 5, a source decoder 6 that applies interpretation processing to broadcast program data to generate television program information, and a display section 7. The microcomputer 5 controls the entire program recorder and outputs a recording instruction to record a program to the recording processing control section 3 when detecting view start so as to start video recording as its control and the recording control section 3 records the program viewed at present to the recording medium 4 according to the recording instruction.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of
rejection]

[Date of requesting appeal against examiner's decision of
rejection]

[Date of extinction of right]
